

Challenger Black Friday vouchers: S$150 off S$1,500, to 30 Nov

Description

default watermark

Challenger has stacked a pile of voucher codes on top of its Black Friday flash deals, and the best one is **S$150 off a S$1,500 spend** with code BFCM150. The main codes on its BFCM page run until 30 November 2026, 11.59pm.

That gives you Monday to sort out the cart. Check the terms at checkout before you pay, because the codes apply to selected products and stocks are limited.

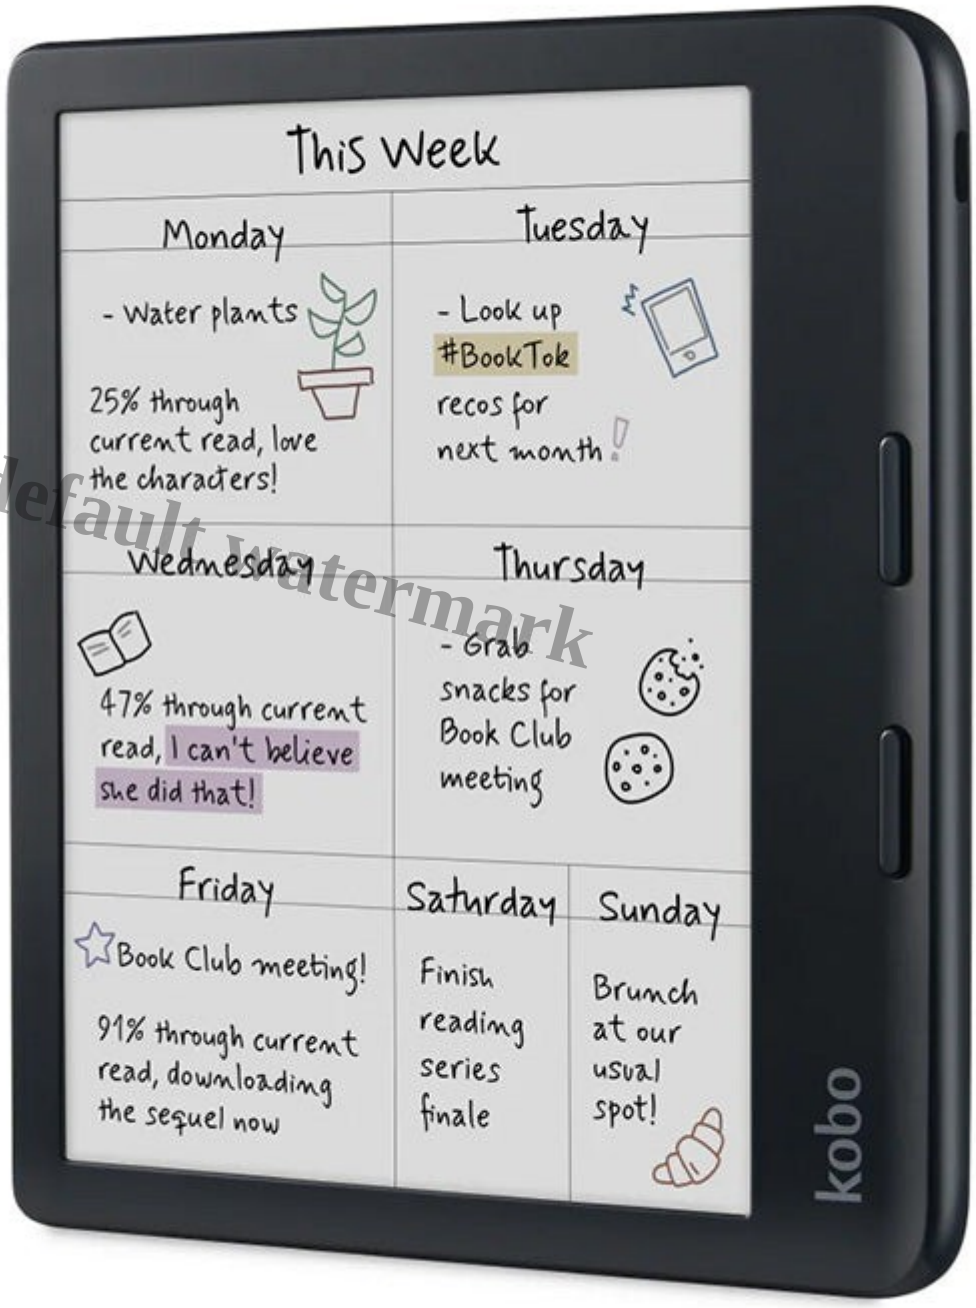

Challenger Black Friday vouchers: the codes to key in

The three headline codes need a minimum spend on â??selected productsâ?•, and are valid from 26 November, 6pm, to 30 November, 11.59pm, while stocks last. SAMSUNGBF20 and BFCMMTR10 start earlier the same day, at midnight.

- BFCM50: S$50 off with a S$600 minimum spend
- BFCM90: S$90 off with a S$1,000 minimum spend
- BFCM150: S$150 off with a S$1,500 minimum spend
- SAMSUNGBF20: S$20 off with S$300 on selected Samsung phones, tablets and watches
- BFCMMTR10: S$10 off with S$299 on Asus monitors

The longer-running codes are worth a look too. FGD50, FGD80 and FGD150 take S$50, S$80 and S$150 off selected PCs and notebooks at S$1,200, S$1,500 and S$3,000 minimum spends, from 16 to 30 November. OPPO100 knocks S$100 off the OPPO Find X10 Series, and GRM5P gives 5% off selected Garmin watches.

RECYCLE10 adds another 10% off selected power banks, power adapters and travel adapters. All of these end on 30 November at 11.59pm.

Flash deal prices worth checking

Challengerâ??s Black Friday flash deals end on 30 November 2026 at 11.59pm Singapore time. A banner on the page promises savings of up to 76%, plus flash deals and additional vouchers, though that top figure will apply to only a few items.

A few prices from the flash deal list:

- Apple iPad 11-inch A16 Wi-Fi 128GB (Silver): S$629, down from S$649
- Kobo Libra Colour eReader: S$329.90, from S$369.90
- SanDisk Extreme Portable SSD V2 1TB: S$299, from S$429
- Lenovo Tab One Wi-Fi 4+128GB: S$188, from S$249
- Xiaomi Redmi Note 15 Pro 12+256GB 5G: S$459, from S$509

The SanDisk drive is the biggest cut of that lot at S$130, a 30% drop. The iPad saving is a modest S$20, so a voucher is what makes the maths interesting there.

How to get the most from the stacking

Read the â??selected productsâ?• line before you build a basket around a code. Each voucher lists which items qualify, and a minimum spend usually has to come from eligible lines. Codes are also capped by redemptions, and the panel marks some as fully redeemed.

Orders placed with a promo code or an advertised limited set cannot be cancelled or amended once you receive the order acknowledgement email, per the terms on the page. That matters if you are tempted to tweak a basket after paying.

Before the clock runs out

- Add the item first, then enter the code at checkout to see if the minimum spend is met

- Do not mix codes assuming they stack; test each one on the cart page
- Look at the end time: most codes stop at 11.59pm on Monday 30 November

Stock is the real limit. Flash deals and â??while stocks lastâ?• codes can vanish before the timer does, so kiasu shoppers should check out early on Monday rather than at 11pm.
