Image not found or type unknown

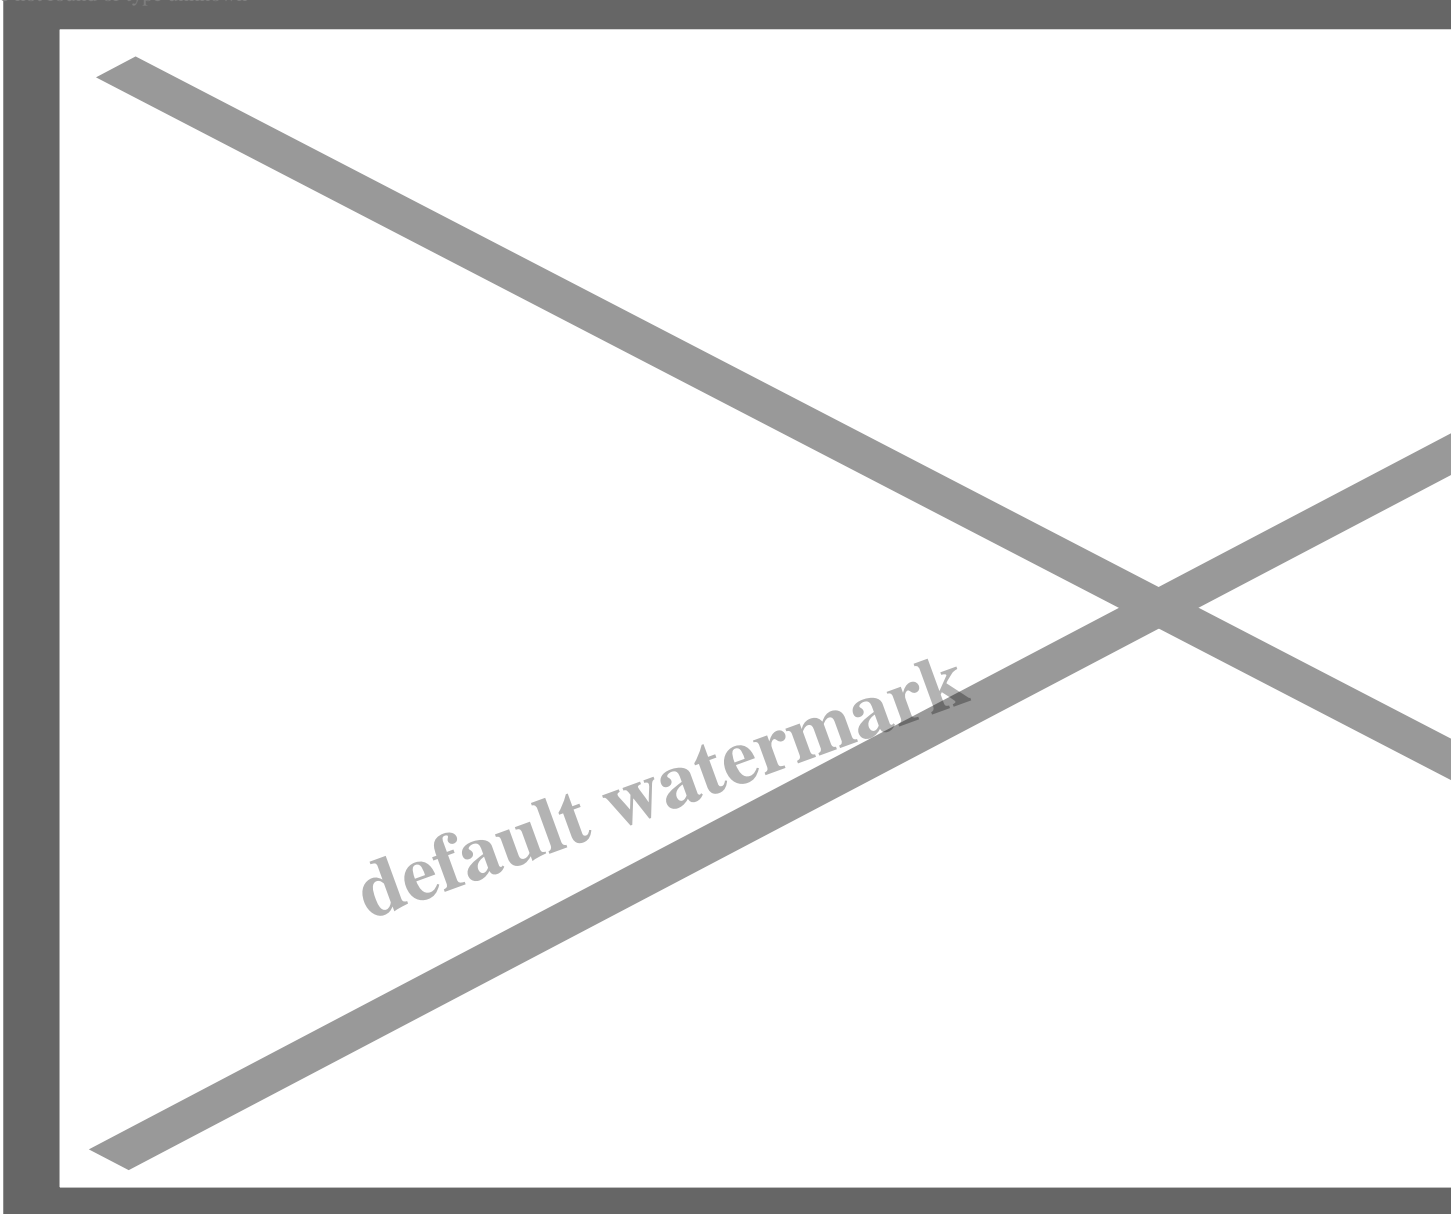

**Terms & Conditions:** Offer valid online at [Crocs.com.sg](https://Crocs.com.sg). Valid on selected products only. Cannot be combined with any other offer or promotion. Offer valid while supplies last. Offer not valid on previous purchases. Limited time only.

My recent trip in Japan took me to some hidden cave with knee deep water level trekking. Though the Crocs I wore didn't shield me from the cold, but it was really stable when walking on the wet pebbles and limestone formation. The stable feeling really helps me to "feel" the ground while I enjoy the stone formation all around me. Check out my video!
