

DJI Osmo Pocket 4 Launches 16 April: 1-Inch Sensor, 4K 240fps and 35% Lighter Than Pocket 3

Description

default watermark

DJI is set to officially unveil the **DJI Osmo Pocket 4** on **16 April 2026 at 8pm SGT (12pm GMT)**, and leaked specs suggest this could be the most compelling pocket gimbal camera yet. Taglined â??The World In My Pocket,â?• the Pocket 4 packs a 1-inch sensor, 4K video at up to 240fps, and a dramatically lighter body â?? all in the same pocketable form factor that made its predecessor a hit with vloggers and content creators in Singapore and beyond.

DJI Osmo Pocket 4: Key Specs and Features

Thanks to extensive leaks from retail packaging and early unboxing videos, we already have a comprehensive picture of what DJIâ??s latest pocket camera will offer. Here is what we know so far.

1-Inch Sensor With 14 Stops of Dynamic Range

The Osmo Pocket 4 retains the proven 1-inch sensor from the Pocket 3 but enhances it with **14 stops of dynamic range** â?? a significant improvement that should deliver better detail in both highlights and shadows. For videographers and vloggers, this means more flexibility in post-production and better-looking footage straight out of the camera, especially in challenging lighting conditions like Singaporeâ??s harsh midday sun or golden hour shoots at Marina Bay.

4K at 240fps Slow Motion

Perhaps the most exciting upgrade is the **4K recording at up to 240 frames per second**. This is a massive leap from the Pocket 3, giving creators the ability to capture stunning slow-motion footage at full 4K resolution. The camera also supports **10-bit D-Log colour** for professional colour grading, along with **2x lossless zoom** for getting closer to subjects without sacrificing image quality.

35% Lighter at Just 116 Grams

One of the most impressive improvements is the **weight reduction of approximately 35%** â?? from 179g on the Pocket 3 down to around **116g** on the Pocket 4. Despite being significantly lighter, DJI has managed to fit a larger **1,545mAh battery** that promises up to **200 minutes of recording time**. That is more than three hours of continuous shooting â?? enough for an entire day of content creation without needing to recharge.

New Hardware Controls and Design

The Pocket 4 introduces several ergonomic improvements over its predecessor. Leaked press images reveal **two new physical buttons** â?? a dedicated zoom rocker and a programmable â??Câ?• shortcut key â?? both positioned for thumb access while filming on the move. The rotating touchscreen is larger and brighter than the Pocket 3â??s display, and there is a new textured grip for better handling.

107GB Built-In Storage â?? But What About the SD Card Slot?

The Osmo Pocket 4 comes with **107GB of built-in storage** with transfer speeds of up to **800MB/s**. However, there has been some controversy around the microSD card slot. DJIâ??s teaser video showed SD cards being symbolically discarded, sparking concerns among creators who rely on expandable storage for long shoots. Some leaked hardware renders, however, show what appears to be a slot cover on the left side, suggesting the SD card slot may still be present â?? just hidden behind a door. We will know for certain on launch day.

Additional Features

The Pocket 4 also packs:

- **ActiveTrack 7.0** â?? DJIâ??s latest subject tracking technology for smooth, automated following
- **4-channel audio** â?? improved audio capture for vloggers
- **Built-in LED fill light** â?? handy for low-light vlogging
- **Wi-Fi 6 and USB 3.1** â?? faster wireless connectivity and wired transfers
- **Physical joystick controls** â?? for precise gimbal adjustment

DJI Osmo Pocket 4 Price and Availability in Singapore

While official Singapore pricing has not been confirmed yet, leaked pricing suggests the following:

- **DJI Osmo Pocket 4 (standard):** US$499â??US$599 (approximately S$670â??S$800)
- **DJI Osmo Pocket 4 Creator Combo:** US$649â??US$749 (approximately S$870â??S$1,005)

For reference, the **DJI Osmo Pocket 3** currently retails at **S$559** at Challenger and Courts Singapore, while the Creator Combo goes for around **S$629**.

The Creator Combo is expected to include a wireless microphone transmitter, magnetic fill light, extension arm, mini tripod, ND filters, gimbal clamp, and carrying cases â?? making it excellent value for serious content creators.

In Singapore, DJI products are available from the official DJI Store, as well as authorised retailers including **Challenger**, **Courts**, **Harvey Norman**, and **Red Dot Photo**. Availability is expected shortly after the global launch on 16 April.

Should You Upgrade From the Pocket 3?

The DJI Osmo Pocket 4 looks like a compelling upgrade for anyone using the Pocket 3 or older models. The combination of **4K 240fps slow motion**, a **35% weight reduction**, significantly **longer battery life** , and new physical controls make it a serious contender for the best pocket vlogging camera in 2026.

For vloggers, travel content creators, and even casual users in Singapore who want a stabilised camera that fits in a pocket, the Osmo Pocket 4 is shaping up to be an excellent choice. Stay tuned for our full review once the device officially launches on **16 April 2026**.
