The headline claim is Dual Ultra Extend Arms. Dreame says the side brush reaches up to 12cm into corners, and the mop pad swings out up to 18cm for edges and low furniture gaps.

PowerDock and hot mop wash

After a run, the robot returns to its PowerDock. Dreame claims a 100°C ThermoHub mop wash that heats the washboard under laboratory conditions, then hot-air drying. The dock also handles automatic dust emptying, water refill, cleaning-solution dispensing and washboard cleaning. An optional water hookup kit is listed for auto refill and drainage where the flat can take it.

Mop pads are listed at up to 280RPM with up to 15N of downward pressure. Dual 120° AI cameras sit in the OmniSight navigation claim.
