

Energy Efficiency Grant 2026: What Singapore Firms Should Check

Description

Singapore's Energy Efficiency Grant has become more important after Budget 2026 extended the scheme from 1 April 2026 to 31 March 2027, with a later expansion announced for the base tier. For businesses facing power bills, equipment upgrades and sustainability requirements, the grant is worth checking before procurement starts.

The key reader point is simple: do not buy first and ask later. EnterpriseSG notes that companies may not be eligible if procurement has already started at the point of application.

Who It Helps

The grant supports businesses investing in energy-efficient equipment. EnterpriseSG's current page names sectors such as construction, data centres, food services, manufacturing, maritime and retail for existing eligibility, with the base tier set to expand more broadly later.

The base tier can support pre-approved energy-efficient equipment up to S\$30,000, while the advanced tier is for larger investments that drive deeper efficiency gains.

Before Applying

Check the equipment list, get quotes, confirm your sector eligibility and apply through the Business Grants Portal before committing to a purchase. The grant is most useful when it is built into a replacement plan, not treated as a reimbursement after a rushed buy.

Businesses can review eligibility on [Enterprise Singapore's Energy Efficiency Grant page](#).
