

Grand 'Brix' Pop-Up Experience by The LEGO Group

Description

It's September! F1 season is here! There are so many F1-themed events popping up all over the island. The LEGO Group has one and Little Big Red Dot was invited to the sneak preview held at Wisma Atria in Orchard Road.

Oh yes, we are Mercedes-AMG fans for the day ok?

We were early and there was coffee and some light snacks for the media. I did not have any. I was engrossed by the events around me.

default watermark

This was the goodie bag. Do you have a LEGO passport? You can get stamps from LEGO shops around the world to fill your LEGO passports.

Everything made in LEGO looks better. Imagine if this was the trophy at this year's F1 race. I think that would be rather unique.

default watermark

Underneath the sheets was an F1 car built out of LEGO bricks.

Closed for a private event? Oh wait, I am at the private event!

Loads of the media were early.

default watermark

I got a custom goodie bag. That's me being told that there were stations I had to clear at the event.

default watermark

With my own name! Wow! Thanks, LEGO!

And now for the unveiling...

All the LEGO fan boys...

I think I would take half of my lifetime to build this. The attention to detail is amazing. I believe this is life sized.

The various sponsors of the team were reflected on the model using LEGO bricks. They were not decals pasted on.

default watermark

This is perhaps in itself worth going down.

You can actually sit INSIDE the LEGO car.

Everybody wanted a photo of the LEGO car.

default watermark

The activities for the participants were in this booth.

At the car racing station, you had to build a racing car out of LEGO and race it down the slope against someone else's build.

Suffice to say, I won my race!

default watermark

Race training was a test of one's reflexes. You hit the red buttons as they pop up.

Some guy did it in 17 seconds. I think that is fast.

This is the pit stop station where you would have to fix up the tyres and wheels of the F1 car in under a minute.

Fortunately it is just the wheels and the covers and not the whole car. It was a bit fiddly but I got it done in under a minute.

Then there are photo opportunities. Lewis Hamilton and George Russell models. I do not think these are true to size. Perhaps just mannequins in racing suits.

default watermark

You get to stand on the LEGO podium.

With the LEGO trophy!

There is a redemption section just before you head out of the booth. Clear all sections and you can redeem some LEGO stickers.

So head down to the Grand "Brit" Pop-up Experience at Wisma Atria!

The F1 race season is upon us. This is a family friendly way to get the whole family in the racing groove.

Yours sincerely,

Daryl
