

Hobbies Fair 2026 At Suntec: Workshops, Demos And Community Zones

Description

default watermark

Hobbies Fair 2026 is the companion event to Asia Cat Expo at Suntec, but it has a broader brief: games, collectibles, sport, outdoor interests and modern tech-driven hobbies under one roof.

It runs on 27 and 28 June 2026 from 10am to 8pm at Suntec Convention Centre Halls 401 and 402.

Who It Works For

The organiser describes the fair as open to curious beginners, serious hobbyists and families. That makes it useful for people who want to try a few interests before joining a club, buying gear or signing up for a longer class.

The expected format includes workshops, live demonstrations and community-led experiences. It is likely to be strongest for visitors who prefer trying, watching and asking questions instead of only browsing retail booths.

The fair brings hobbyists and brands together at Suntec.

How To Pair It

Because it sits beside Asia Cat Expo, the weekend can work as a larger Suntec outing. Cat owners can split the day between pet-focused shopping and broader hobby zones, while families can divide attention by age and interest.

If you only have one hour, pick the workshop or demo you care about first. If you have half a day, leave time for adjacent halls and food breaks because Suntec convention weekends tend to bunch crowds around lunchtime.
