

Home Appliance Fair at Singapore EXPO: Compare Before the 70% Sign

Description

The Home Appliance Fair runs from 8 to 10 August 2026, 10am to 8pm, at Singapore EXPO Hall 5B with free public admission. Treat **up to 70% off** as an invitation to verify exact models, not a saving guaranteed on every item. The controlling references checked for this guide are [Singapore EXPO event listing](#) and [NEA household energy labels](#).

Choose the branch that matches your case

Situation	Action
You already know the exact model	Compare fair all-in price with current authorised sellers
You only know the appliance type	Shortlist capacity and energy requirements before going
Delivery or installation is complex	Price those services before paying
The discount is against an unclear reference price	Pause until the model and comparison price are documented

Fix the event facts

The fair is in Hall 5B from 10am to 8pm on 8, 9 and 10 August, and entry is free. [Singapore EXPO event listing](#).

Use the official EXPO listing for logistics, then check organiser updates before leaving. This matters because the decision is not complete until the evidence, timing and responsible person agree.

Translate percentage into dollars

Up to identifies the best advertised discount, not the typical saving. [NEA household energy labels](#).

Record model code, reference price, fair price and included items. This matters because the decision is not complete until the evidence, timing and responsible person agree.

Compare lifetime energy cost

NEA's energy label lets shoppers compare efficiency and estimated annual energy cost for regulated products. [Singapore EXPO event listing](#).

Multiply the annual difference by a realistic ownership period. This matters because the decision is not complete until the evidence, timing and responsible person agree.

Use exact model codes

Retailer-exclusive variants can look similar while changing capacity, features or warranty. [NEA household energy labels](#).

Photograph the full model label and written quote. This matters because the decision is not complete until the evidence, timing and responsible person agree.

Add delivery and installation

Removal, stacking kits, piping, brackets, electrical work and restricted delivery slots can erase a headline saving. [Singapore EXPO event listing](#).

Ask for one signed all-in total. This matters because the decision is not complete until the evidence, timing and responsible person agree.

Protect the exit option

Fair purchases may have deposits, cancellation limits and display-set conditions. [NEA household energy labels](#).

Read warranty provider, return rights and delivery acceptance terms before payment. This matters because the decision is not complete until the evidence, timing and responsible person agree.

Use an eight-year appliance total-cost calculation

Turn the rule into a working aid with columns for the controlling fact, the evidence you hold, the result and the date checked. For this task, the decisive question is to decide whether the fair is worth a visit and compare actual models without anchoring on headline discounts. A blank evidence cell is a stop sign, not permission to use a remembered number or a marketing summary.

Test at least two plausible branches from the table above. That comparison shows which fact changes the answer and prevents the most convenient scenario from being treated as the only possible one.

Label every arithmetic step as an LBRD calculation and keep the official figure beside it.

Add an exact-model fair quote comparison sheet

The second aid should expose what the first one can hide: a deadline, cost, handover, alternative route or follow-up duty. Write the downside of being wrong beside each branch. Where the consequence is legal, financial, medical or safety-related, the competent authority and case-specific professional decision remain controlling.

Recheck the live source immediately before the irreversible step. Save only the minimum evidence needed, protect personal details, and note any limitation. Record who will act, the last safe date and the evidence that closes the task.

Stop when the evidence no longer matches

Pause the decision if you encounter treating up-to-70% as typical, comparing different model variants, ignoring annual energy cost. Those are not small drafting errors; each can change the eligibility, cost, route or safety outcome described above. Return to Singapore EXPO event listing for the controlling rule and use NEA household energy labels to check the second part of the decision.

If the authority page, account record, booking screen or case document disagrees with this guide, use the live record. Escalate to the named organisation or an appropriately qualified professional when a deadline is running, a child or adult is unwell, a licence or tax position is uncertain, or an irreversible payment is due. Keep the question narrow and provide the facts needed for a case-specific answer.

Work through a realistic example

A refrigerator is S\$250 cheaper at the fair but is estimated to cost S\$60 more a year in electricity than the alternative. Over eight years, the energy gap is S\$480, outweighing the upfront saving by S\$230 before delivery differences. This is an LBRD comparison method, not a quote.

Before you act

1. Set appliance capacity and dimensions
2. List three acceptable model codes
3. Capture the fair all-in price
4. Read the NEA energy label
5. Verify warranty provider
6. Price delivery and installation
7. Read cancellation and display-set terms

Mistakes that change the answer

- Treating up-to-70% as typical

- Comparing different model variants
- Ignoring annual energy cost
- Leaving installation out
- Paying before reading deposit terms

Questions readers ask

Is admission free?

Yes, the official listing says open to the public with free admission.

Where is it?

Singapore EXPO Hall 5B.

Does every item have 70% off?

No such conclusion follows from an “up to” claim; verify the exact model.
