

IMDA ESER: Register Eligible Telecom Equipment for Five Years

Description

ESER is a free five-year equipment-registration route for eligible short-range, low-power and specified telecom equipment. The applicant must be a local ACRA entity with a Telecommunication Dealer Licence and must self-declare conformity. This guide is for a singapore supplier importing or selling short-range or eligible telecom equipment and resolves one task: choose ESER only when the company, equipment and conformity evidence qualify. The material claims were checked against [IMDA equipment registration overview](#) and [IMDA IRIS ESER application](#).

Choose the route that matches your case

Situation	What to do
Short-range or low-power device fits ESER list	Build conformity and brochure documents
Mobile terminal or broadband equipment	Assess SER rather than ESER
Base station, repeater or higher-risk radio	Assess GER
Equipment is prohibited or exempt	Do not force it into ESER

Classify the device

Bluetooth, WLAN, RFID and other listed categories may fit ESER, while cellular and base-station equipment use different routes. According to [IMDA equipment registration overview](#), the controlling detail for this branch is the specific rule or service condition cited here.

Record frequencies, output power, interfaces and intended use.

Verify the applicant

The company must be locally registered and hold the relevant dealer licence. According to [IMDA IRIS ESER application](#), the controlling detail for this branch is the specific rule or service condition cited

here.

Keep UEN and licence details current before applying.

Own the declaration

Automated approval does not mean IMDA reviewed the test report before registration. According to [IMDA equipment registration overview](#), the controlling detail for this branch is the specific rule or service condition cited here.

The supplier remains responsible for an accurate conformity assessment.

Prepare evidence

Use acceptable test reports or certification, technical specifications, product picture and brochure. According to [IMDA IRIS ESER application](#), the controlling detail for this branch is the specific rule or service condition cited here.

The model identifiers must match across every document.

Understand validity

New and modified-model ESER registrations are free and valid five years under the live application page. According to [IMDA equipment registration overview](#), the controlling detail for this branch is the specific rule or service condition cited here.

Schedule renewal and reassess changes that require a new registration.

Plan post-market surveillance

IMDA may request the supporting test evidence after registration. According to [IMDA IRIS ESER application](#), the controlling detail for this branch is the specific rule or service condition cited here.

Keep the complete technical file available, not only the registration email.

Run the numbers or sequence

A Bluetooth product may fit ESER if its radio parameters and evidence meet the technical specification. A cellular handset does not become ESER-eligible merely because it also uses Bluetooth.

The calculation or sequence above is an LBRD working example. Replace every example input with the amount, date, access condition or document from your own case. Keep the official rate or threshold beside the working so another person can reproduce the answer.

Build a verification note another person can check

Before acting, create a one-page case note headed with the task, the date checked and the person responsible. Copy only the facts that affect your decision, then attach the statement, booking, application, receipt, map record or screenshot that supplies your own input. This separates a published rule from a personal assumption. If the official page changes, keep the earlier dated record but rework the decision with the live version.

Controlling source	What to verify	What to retain
IMDA equipment registration overview	ESER categories, dealer-licence prerequisite, five-year validity and scheme comparison.	Record the page date, the exact rule used and the case input it governs.
IMDA IRIS ESER application	Eligibility, automated approval, free registration, documents and post-market evidence.	Record the page date, the exact rule used and the case input it governs.

Read the source in context, including definitions, exceptions and effective dates. A relevant page is not proof by itself: the cited passage must contain the particular rate, deadline, eligibility condition, access rule or warning used here. Where two official channels appear inconsistent, pause and ask the authority about the exact case rather than choosing the more convenient answer.

Use the guide with its limits

For a business, the person who knows the rule is not always the person who controls payroll, Bizfile, the bank guarantee or the grant file. Assign an owner and reviewer, preserve the submission acknowledgement and schedule a check after the external system has processed the change.

No interview, personal use, fresh field visit, survey result or price check is claimed unless explicitly stated. Availability, fees and procedures can change. Reopen the linked authority page immediately before payment, travel, filing or emergency use.

Before you act

1. Confirm dealer licence
2. Classify equipment
3. Check prohibited and exempt lists
4. Match technical specification
5. Collect test evidence and brochure
6. Submit accurate declaration
7. Calendar five-year review

Mistakes that change the outcome

- Choosing ESER from one feature

- Treating automated approval as testing
- Using mismatched model names
- Discarding test reports
- Selling before required registration

Continue with the relevant LBRD guide

Next, [compare a different product-compliance route](#). You can also [prepare for post-market safety action](#).

Questions readers ask

Which source controls this decision?

IMDA equipment registration overview controls the main rule, with IMDA IRIS ESER application used for the second check.

Can I use the worked example as my final figure?

No. Replace every input with your own dated record and confirm the live rule before acting.

What should I save?

Keep the official page date, your case inputs, the calculation or sequence, and the submission or payment acknowledgement.
