Description

Jetstar will suspend its Perth-Singapore service from Saturday, 24 October 2026, so Singapore travellers with late-2026 Western Australia plans should check whether their booking is affected before locking in hotels, car rentals or onward connections.

The change is a seasonal network adjustment, not a general warning about Perth travel. The practical point is simple: if your Jetstar itinerary uses this route after the final service date, you may need a different flight plan.

What Changes From 24 October 2026

The last Jetstar Perth-Singapore service operates on Saturday, 24 October 2026. After that date, the airline is suspending the route for the season.

Impacted customers will be reaccommodated onto a Qantas service or can choose a full refund. Affected travellers will be contacted directly through the email address or phone number attached to the booking.

If You Already Have A Booking

Start with the booking channel. A ticket bought directly from Jetstar is usually managed through the airline, while an itinerary bought through an agent, travel platform or package provider may require that seller to process changes.

Check three things before accepting a replacement: departure and arrival times, baggage allowance, and whether any domestic Australian connection still works. A shift of a few hours can affect hotel check-in, car rental pickup, school-holiday plans or a regional Western Australia connection.

Before You Accept An Alternative Flight

If you are offered a Qantas service, compare the full itinerary rather than only the airline name. Look at the operating carrier, terminals, checked baggage, seat selection, meal inclusions and frequent-flyer details.

If the new timing no longer suits the trip, a refund may be cleaner than rebuilding the rest of the itinerary around a poor connection. Travellers with prepaid accommodation or tours should also check whether any change fee or insurance claim depends on written airline confirmation.

If You Are Still Planning Perth

Perth remains a straightforward destination from Singapore, but the lowest fare is not the only number to compare after a route change. Check direct options, one-stop routings, total travel time, baggage, overnight timing and refund flexibility before booking.

Families and first-time Western Australia travellers should be especially careful with late arrivals, because Perth itineraries often rely on a rental car, self-drive day trips or early starts outside the city.
