

## Lenovo Re:Match At SCAPE: Football Meets Gaming And AI PCs

### Description

Lenovo Re:Match is running at \*SCAPE #03-07 until 31 July 2026, giving football fans and gamers a hands-on stop around Orchard. \*SCAPE describes it as a tech and gaming space where football meets innovation.

The timing lines up with Lenovo's official technology partnership around FIFA World Cup 2026, but the local value is more practical: gamified challenges, fan activities, merchandise and hands-on time with Lenovo AI PCs and Legion laptops.

### What Is Inside

The official listing points to fan activities and product interaction rather than a passive showroom. That should make the space more useful for visitors who want to test devices, compare gaming hardware or simply try a football-themed challenge with friends.

Because the experience runs until 31 July, it is not a one-weekend rush. Students and gamers can time the visit around Orchard plans instead of crowding into opening weekend.

- Run: until 31 July 2026.
- Venue: \*SCAPE #03-07.
- Listed start time: 11am.
- Focus: football fan activities, gamified challenges, merchandise, Lenovo AI PCs and Legion laptops.

### Who Should Visit

Lenovo Re:Match suits teens, students, football fans and PC buyers who prefer trying hardware before reading spec sheets. It is also an easy stop if you are already at \*SCAPE for youth events, pop-ups or dance activities.

For anyone comparing gaming laptops, the useful move is to test comfort and responsiveness in person: keyboard feel, screen brightness, fan noise and how the machine handles a short game or demo. Those details are hard to judge from product pages but matter if the laptop will double as a school, work and play device.
