
Marketplace Safety Ratings 2026: What the Ticks Really Mean

Description

In the 2026 ratings, Amazon, Lazada, Shopee and TikTok Shop receive four ticks, Carousell two and Facebook Marketplace one. The rating measures platform safeguards, not whether a particular listing is genuine. This guide is for a singapore shopper choosing where and how to transact online and resolves one task: use the 2026 platform safety ratings without mistaking them for a guarantee on an individual seller. The material claims were checked against MHA transaction safety ratings and ScamShield e-commerce scam guide.

Choose the route that matches your case

Situation	What to do
Four-tick platform	Still keep payment and messaging inside the platform
One- or two-tick platform	Apply stronger seller and payment checks
Seller requests an external transfer	Stop and keep the transaction on-platform
Price or urgency is implausible	Leave the listing and verify independently

Read ticks as platform controls

MHA assesses seller verification, monitoring, secure payment, records, disputes and effectiveness. According to MHA transaction safety ratings, the controlling detail for this branch is the specific rule or service condition cited here.

A high score lowers some platform risk but cannot certify each seller or item.

Compare the 2026 table

Four services received four ticks, Carousell received two and Facebook Marketplace one. According to ScamShield e-commerce scam guide, the controlling detail for this branch is the specific rule or service condition cited here.

Use the exact current table because safeguards and ratings can change by year.

Stay inside protected flows

Moving to a chat app or bank transfer can remove platform evidence and dispute tools. According to MHA transaction safety ratings, the controlling detail for this branch is the specific rule or service condition cited here.

Keep product description, messages, payment and delivery tracking together.

Verify expensive items

For high-value goods, check serials, warranty, condition and seller identity through safe methods. According to ScamShield e-commerce scam guide, the controlling detail for this branch is the specific rule or service condition cited here.

Meet only in an appropriate public place if the platform model requires collection.

Use a stop rule

Unusual urgency, overpayment stories and requests for fees are reasons to pause. According to MHA transaction safety ratings, the controlling detail for this branch is the specific rule or service condition cited here.

Do not let a countdown or claimed competing buyer override verification.

Report with evidence

Preserve the listing URL, seller account, chat, payment record and time. According to ScamShield e-commerce scam guide, the controlling detail for this branch is the specific rule or service condition cited here.

Use platform reporting and ScamShield guidance, then contact the bank quickly if money moved.

Run the numbers or sequence

A four-tick platform plus an external bank-transfer request is still a high-risk transaction. The safer choice is to use the protected checkout or not transact.

The calculation or sequence above is an LBRD working example. Replace every example input with the amount, date, access condition or document from your own case. Keep the official rate or threshold beside the working so another person can reproduce the answer.

Build a verification note another person can check

Before acting, create a one-page case note headed with the task, the date checked and the person responsible. Copy only the facts that affect your decision, then attach the statement, booking, application, receipt, map record or screenshot that supplies your own input. This separates a published rule from a personal assumption. If the official page changes, keep the earlier dated record but rework the decision with the live version.

Controlling source	What to verify	What to retain
MHA transaction safety ratings	2026 platform tick ratings and the criteria used to assess safeguards.	Record the page date, the exact rule used and the case input it governs.
ScamShield e-commerce scam guide	Reported 2025 losses and practical signs and transaction protections.	Record the page date, the exact rule used and the case input it governs.

Read the source in context, including definitions, exceptions and effective dates. A relevant page is not proof by itself: the cited passage must contain the particular rate, deadline, eligibility condition, access rule or warning used here. Where two official channels appear inconsistent, pause and ask the authority about the exact case rather than choosing the more convenient answer.

Use the guide with its limits

A public label or consumer rule works best when paired with a calm verification routine. Save the evidence, leave the suspicious or disputed channel, and return through an official app, typed address or known hotline before taking an irreversible step.

No interview, personal use, fresh field visit, survey result or price check is claimed unless explicitly stated. Availability, fees and procedures can change. Reopen the linked authority page immediately before payment, travel, filing or emergency use.

Before you act

1. Check the current tick rating
2. Review seller history
3. Keep chat on-platform
4. Use protected payment
5. Inspect high-value goods
6. Stop on urgency
7. Save and report evidence

Mistakes that change the outcome

- Treating ticks as a guarantee
- Leaving the platform
- Paying a fee to receive money

- Trusting screenshots
- Delaying bank contact

Continue with the relevant LBRD guide

Next, check suspicious digital messages. You can also verify safety after a purchase.

Questions readers ask

Which source controls this decision?

MHA transaction safety ratings controls the main rule, with ScamShield e-commerce scam guide used for the second check.

Can I use the worked example as my final figure?

No. Replace every input with your own dated record and confirm the live rule before acting.

What should I save?

Keep the official page date, your case inputs, the calculation or sequence, and the submission or payment acknowledgement.
