Meta Glasses start at S\$349, and the range adds new Capri and Nova designs. The separate LISA line opens at S\$559, with Adventurer and Capri editions.

Ray-Ban Meta Gen 3 from S\$669

Ray-Ban Meta Gen 3 starts at S\$669 in Singapore. The third generation has a slimmer fit, a six-microphone array, a customisable action button and up to nine hours of battery life.

Meta also plans to bring Muse, its personal AI agent, to existing AI glasses. The company describes Muse as a hands-free assistant that can keep working in the background on longer tasks such as

planning, shopping checks and bookings, then report back when a job is done.

Ray-Ban Meta Audio and Meta VR Glasses (due in spring 2027) have no Singapore prices yet.
