

Microsoft Store Black Friday Singapore: Surface Pro from S$1,879, S$350 off, to 9 December 2026

Description

default watermark

Most Black Friday laptop sales in Singapore end on 30 November. The Microsoft Store Black Friday Singapore sale runs longer: the Surface offers on the official page end on 9 December 2026. The headline is S$350 off selected Surface Pro and Surface Laptop models, with the 13-inch Surface Pro listed from S$1,879 instead of S$2,229.

The Xbox Design Lab offer ends sooner, on 2 December. Here is what is actually on the page, with the prices as shown on 25 November.

Surface prices in the Microsoft Store Black Friday Singapore sale

Microsoft lists â??fromâ?• prices for each Surface family, so the cheapest configuration is the one that matters for the headline figure. Higher-spec versions get the same S$350 cut.

- Surface Pro, 13-inch (12th Edition): from S$1,879, down from S$2,229
- Surface Laptop, 13.8-inch (8th Edition): from S$1,949, down from S$2,299
- Surface Laptop, 15-inch (8th Edition): from S$2,099, down from S$2,449

Pricier configurations show the same saving, for example a 13-inch Surface Pro at S$2,649 (was S$2,999) and a 15-inch Surface Laptop at S$2,749 (was S$3,099). The top end of the range gets S$350 off too, with a 15-inch Surface Laptop at S$4,749 instead of S$5,099.

The three S$350 deals worth checking first

The sale page spotlights three specific configurations, each with S$350 off and an offer end date of 9 December 2026.

1. Surface Pro 13-inch with Snapdragon X2 Elite (12 core), OLED display, black, 24GB RAM and 512GB SSD
2. Surface Laptop 13.8-inch with Snapdragon X2 Plus (10 core), HDR touchscreen, jade, 24GB RAM and 512GB SSD

3. Surface Laptop 13.8-inch with Snapdragon X2 Plus (10 core), HDR touchscreen, black, 32GB RAM and 512GB SSD

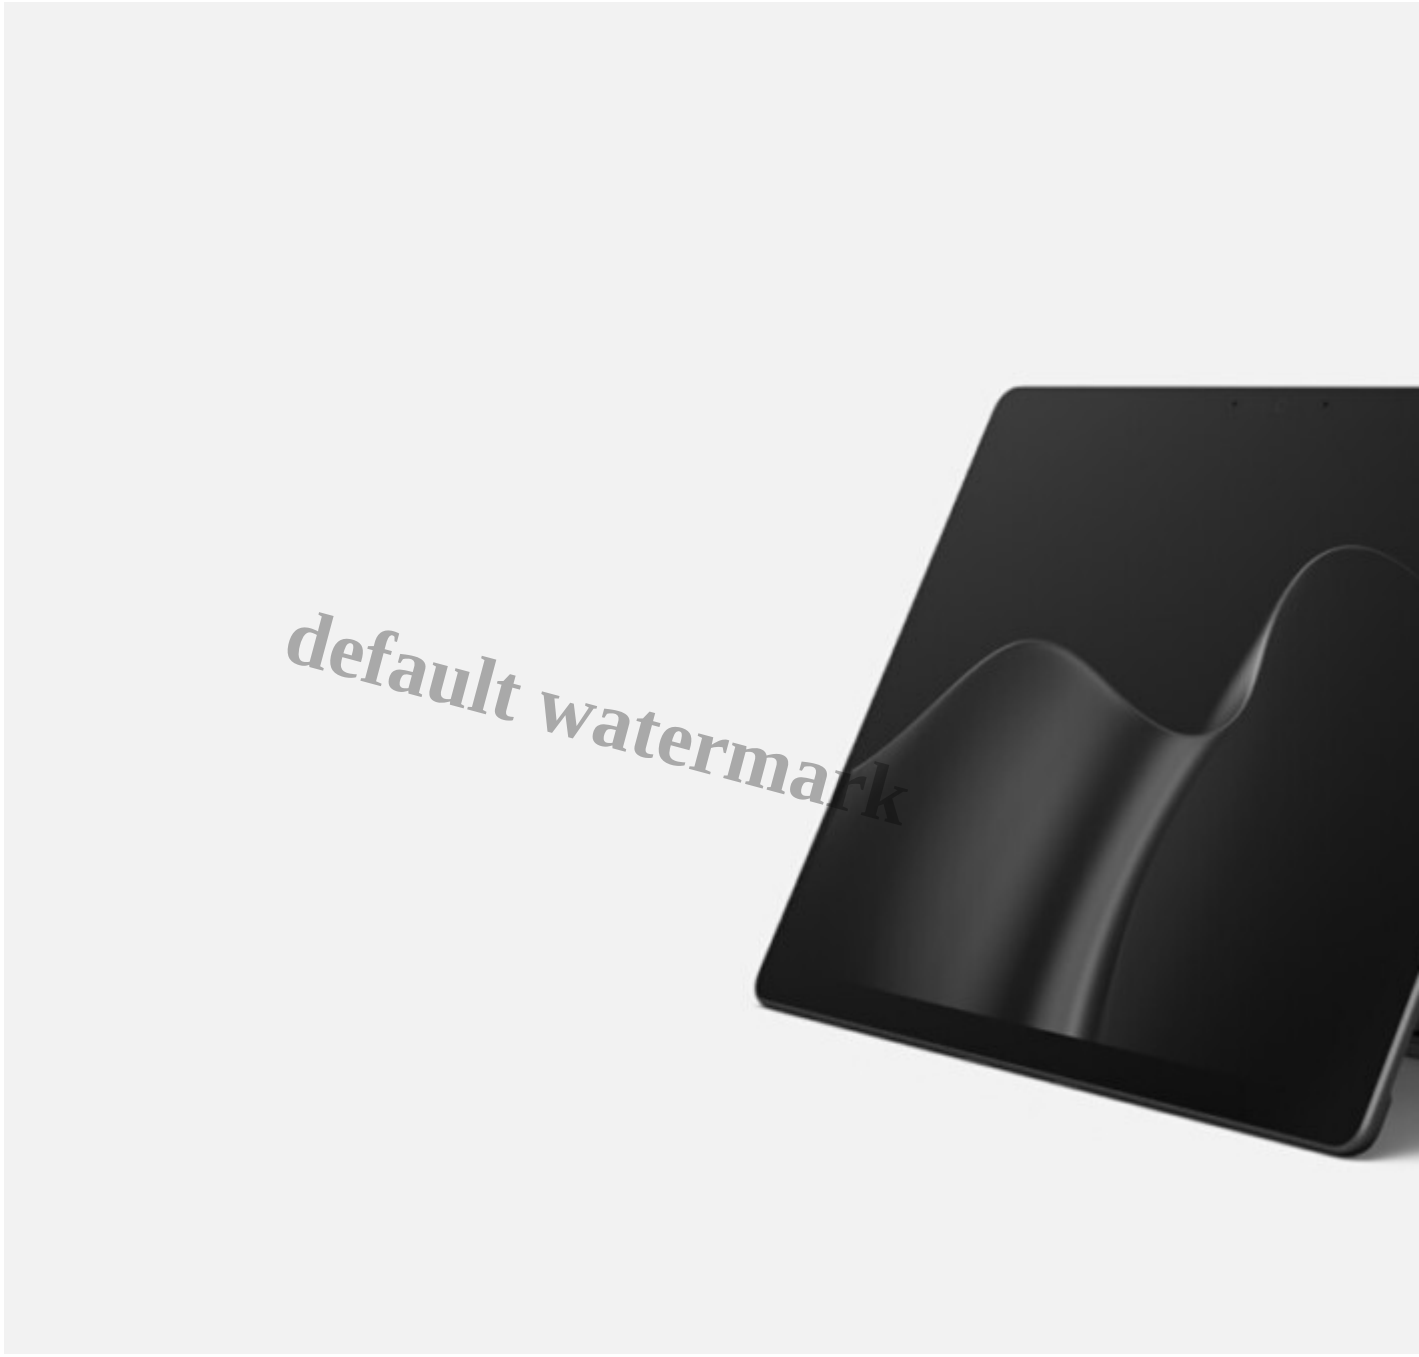

Memory is the spec to look at. A 24GB or 32GB machine with a 512GB drive is more than most office and study work needs today, and RAM cannot be upgraded later on this kind of laptop. If you are comparing models, the Surface Laptop gives you the traditional clamshell while the Surface Pro is a tablet with a kickstand and a detachable keyboard, so check whether the keyboard is included in the price you are looking at.

Extras that make the price safer

Two terms on the page are worth reading before you pay. Microsoftâ??s holiday price protection covers qualifying physical consumer products bought online from the Microsoft Store from 1 October to 2 December 2026, and a price adjustment can be requested until 31 January 2027. Its extended returns policy covers purchases in the same window, which can be returned through 31 January 2027.

The page also states free shipping and up to 60 days of free returns, and a limited-time trade-in offer that adds cash back when you buy a select Surface and trade in an eligible device. Microsoft says supplies are limited and that offers can be changed or withdrawn, so a deal that you see in the morning can be gone by the evening.

Xbox, games and Microsoft 365

- Xbox Design Lab: up to 15% off custom controllers, plus free engraving, until 2 December 2026
- Digital game deals: up to 75% off select Xbox titles
- Microsoft 365: save up to S$37.89 on a yearly plan, or start a 1-month free trial
- Gifts under S$200: a separate section on the sale page

The Design Lab deal is the one to rush. You design the controller, pay once, and the engraving fee is waived until 2 December, which makes it a decent Christmas present for a gamer who already has

everything else.

Is it a good deal?

A S$350 discount on a premium laptop is roughly 15% off, which is solid but not mad. If you were already planning a Surface, the extended returns and price protection tilt things in your favour, because you can buy now and still claim a lower price later in the window. If you are open to other brands, compare against the other retailers before you pay: our roundups of the Razer Cyber Weekend deals, the Samsung Black Friday sale and the Google Pixel 11 holiday offers cover other gadgets in the same price bracket.

Check the cart total including delivery before you click pay. Screenshot the price and keep your order confirmation, in case you need to claim a price adjustment or a return later.
