

## National Family Festival 2026 Has Islandwide Family Events This Weekend

### Description

[National Family Festival 2026](#) is running through the June school-holiday stretch with islandwide activities for families.

The official festival calendar lists several 13 and 14 June options, including ArtsEverywhere@JLG: heART at Jurong Lake Gardens, Our Family Table at Anchorvale Village Hawker Centre, T-Play Championship Cup at HomeTeamNS Bukit Batok and a Lot One family-festival weekend.

### What Is Happening This Weekend

The useful thing about this weekend's calendar is that it is spread across neighbourhoods instead of asking every family to travel to one venue.

Parents can choose a park-based activity, a hawker-centre family-table session, a HomeTeamNS competition stop or a mall-based family festival, depending on the child's age and how far the household wants to travel.

- ArtsEverywhere@JLG: heART: 13 to 14 June 2026 at Lakeside Field, Jurong Lake Gardens.
- Our Family Table: 13 June 2026 at Anchorvale Village Hawker Centre.
- T-Play Championship Cup: 13 June 2026 at HomeTeamNS Bukit Batok.
- National Family Festival @ Lot One: 13 to 14 June 2026 at Lot One.

## How To Choose A Stop

Choose Jurong Lake Gardens if you want an outdoor arts-linked plan and the weather holds. Pick Anchorvale Village if a meal-based activity is easier for the household.

HomeTeamNS Bukit Batok is more suitable for families already interested in T-Play, while Lot One is the simpler Choa Chu Kang option for a mall-based weekend stop.

## Planning Notes

Families with younger children should treat the festival as a flexible drop-in rather than a rigid full-day schedule. Choose the closest useful venue first, then decide whether to extend the outing after the main activity.

The festival calendar also runs beyond this weekend, so there is no need to overload Saturday and Sunday if the child's nap, meal or homework schedule is already tight.

For more child-friendly ideas around the same weekend, the [Little Big Red Dot things-to-do archive](#) is useful for checking nearby event combinations before leaving home.
