

Samsung Galaxy A18 goes on sale in Singapore at S$328, with S$30 off until 8 December

Description

default watermark

Samsungâ??s Galaxy A18 went on sale in Singapore on 13 November at S$328, in a single 4GB RAM and 128GB storage version. Samsung Electronics Singapore positions it as its entry-level smartphone.

The Singapore unit is the LTE version, and it runs on MediaTekâ??s Helio G99+, a 6nm chip. You get it in Light Blue, Black or Silver.

The S$30 discount and the free charger

Samsung is taking S$30 off at the till until 8 December, 11.59pm. The catch is where you buy. The discount applies at Samsung Experience Stores, the Samsung Online Store, the Samsung Shop App and consumer electronics and IT stores. The phone is also sold at Samsungâ??s official Lazada, Shopee and TikTok stores, but those channels are not in the S$30 promotion.

Buy it at a Samsung Experience Store or a consumer electronics and IT store and Samsung adds a 25W power adapter worth S$38, without a cable, while stocks last. Online and app buyers get the discount but not the adapter. The products in the promotion may vary by outlet or platform, and Samsung can amend or withdraw it without notice.

What S$328 buys

The screen is a 6.7-inch Super AMOLED panel at FHD+ resolution, 1080 by 2340 pixels, with a 90Hz refresh rate and Samsungâ??s Infinity U notch for the front camera. Memory is LPDDR5, and RAM Plus borrows storage as virtual memory when you want more headroom for games, or can be switched off to keep space for photos.

Key specifications for the Singapore model:

- Display: 6.7-inch FHD+ Super AMOLED, 90Hz
- Chip: MediaTek Helio G99+ (6nm)
- Memory and storage: 4GB RAM, 128GB
- Rear cameras: 50MP wide, 5MP ultra-wide, 2MP macro
- Front camera: 13MP
- Battery: 5,000mAh with 25W fast charging
- Protection: IP64, Gorilla Glass 3 on the front

The 2MP macro camera is the lens to treat as a bonus rather than a reason to buy. The 50MP main camera and the 5MP ultra-wide do the real work.

Six years of updates on a budget phone

The strongest line on the spec sheet is software support. Samsung promises up to six generations of Android OS upgrades and six years of security updates. If you hold a handset until it dies, that matters more than the processor.

The phone also carries Knox Vault, Samsungâ??s hardware-based store for sensitive data, and a back cover made of glass-fibre-reinforced polymer that Samsung rates as thinner and stronger than the Glastic it used on earlier Galaxy A models.

The Galaxy A18 is rated IP64 for dust and water splashes. Image: Samsung

IP64 means protection against dust and water splashes. It is not a rating for a dunk in the pool.

The AI features

Circle to Search lets you circle or tap something on the screen to look it up, and a new Find the Look option searches for a whole outfit and can identify music playing nearby. You can also call up Gemini or Perplexity with a voice command or a long press to drive supported Samsung, Google and selected third-party apps.
