

Snap Fitness West Mall: Singapore's Largest 24/7 Gym Has a Hyrox Zone and Pilates Studio

Description

Westies finally have a reason to stop making excuses. The **Snap Fitness West Mall** outlet has opened as the brand's largest 24/7 gym in Singapore, spanning roughly 7,000 square feet at 1 Bukit Batok Central. With a dedicated Hyrox training zone and a full reformer Pilates studio under one roof, it is a serious upgrade for a part of Singapore that has not always had a lot of premium gym options.

The location itself is doing a lot of the work. West Mall sits right on top of Bukit Batok MRT, so a gym session can slot neatly before or after a grocery run or dinner, rather than requiring a separate trip across town.

What's Inside the Snap Fitness West Mall Outlet

At 7,000 square feet, this is the biggest Snap Fitness in the country, and the equipment list reflects that scale. There are six squat racks, more than 25 pin and plate-loaded machines, and 14 cardio machines, which should be enough to avoid the usual peak-hour queue for a treadmill.

- Dedicated Hyrox training area with full stations
- Reformer Pilates studio for structured classes
- Free group classes: Hyrox, boxing, HIIT, yoga and Zumba
- Separate male and female shower facilities with Dyson amenities in the vanity area

The Hyrox space is worth calling out specifically, since the fitness format has exploded in popularity across Singapore over the past two years but is still awkward to train for properly without dedicated stations. Having a full Hyrox set-up inside a neighbourhood gym, rather than only at a handful of specialist studios, lowers the barrier for anyone curious about trying it.

Membership and Access

A 12-month membership is priced at \$108 a month, which comes with 24/7 access to this outlet plus more than 1,000 Snap Fitness locations worldwide under the same membership. That global access matters more than it sounds if you travel for work or holidays regularly, since it means the membership does not go idle the moment you leave Singapore.

Being a 24/7 facility also means shift workers and early risers are not boxed into the same 6am to 10pm window most gyms operate on. For a neighbourhood that includes a fair mix of both, that flexibility is arguably as valuable as the equipment itself.

Should You Switch Gyms For This

If you are currently paying for a gym further from home purely because the equipment or class options were better, Snap Fitness West Mall closes a lot of that gap. Between the Hyrox zone, the reformer Pilates studio and the free group class line-up, it is trying to cover fitness styles that usually require two or three separate memberships to access.

Source: Snap Fitness

The real test will be how it holds up once the initial opening buzz settles and peak-hour crowds establish themselves, but on paper, this is one of the more complete gym set-ups to land in the west in a while.
