

## Japan's Tsuklio Brings Home-Cooked Meal Subscriptions to Singapore - Here's What to Expect

### Description

Singapore's weekday dinner dilemma just met its match. **Tsuklio**, Japan's fastest-growing home-cooked meal subscription service, has officially launched in Singapore - its first expansion market outside Japan. And for busy households juggling work, school runs and the daily question of "what's for dinner?", it could not be more timely.

Tsuklio meal containers show the chilled weekly-delivery format for Singapore households.

## What Is Tsuklio?

Tsuklio is a **home-cooked meal subscription service** that delivers fresh, nutritious meals prepared daily in a central kitchen under the supervision of registered dietitians. The Singapore launch offers a **4-serving, 3-meal-per-week plan priced at SGD 211 per week.**

Tsuklio's preparation image shows kitchen staff working on the fresh meal-production process.

The meals are designed for families and working adults who want proper home-style dinners without the prep time. Think balanced, wholesome cooking â?? not meal kits requiring assembly, and not restaurant takeaway. Tsuklio positions itself as a solution for the hour between getting home and getting to bed: fast, nutritious, and genuinely satisfying.

## **Why Singapore Makes Sense as Its First International Market**

The choice of Singapore as the launchpad for Tsuklioâ??s Asia expansion is deliberate. Long work hours, a culture of eating out, and the increasing cost of dining means many households here face pressure around weekday dinners. Tsuklio speaks directly to working parents who want to provide nutritious home-cooked meals but may not always have the bandwidth to make them from scratch.

A Tsuklio meal spread shows the family-style dishes behind the Japanese home-cooked subscription service.

It also fits into a growing appetite in Singapore for quality food delivery that goes beyond hawker food or fast-casual dining. Whether Tsuklio can carve out a sustainable niche here â?? competing with the likes of local meal prep services and the general convenience of food delivery apps â?? will be

interesting to watch. For now, for families willing to commit to a weekly subscription, it presents a genuinely interesting alternative. Explore more food options in our [Food & Drinks section](#).
