

vivo V80 Lite 5G Launches in Singapore With Record 10,000mAh Battery

Description

vivo Singapore has officially launched the **vivo V80 Lite 5G**, bringing a 10,000 mAh-class battery to the V Series for the first time, alongside a Guinness World Records® title, military-grade durability and a specs sheet that punches well above its price point.

A record-setting battery

The headline feature is the V80 Lite 5G's 10,000 mAh battery, the largest yet in the V Series. It powered the device through a 32-hour-and-37-minute endurance test, earning a new *GUINNESS WORLD RECORDS* title for the longest electronic product testing livestream — a fairly emphatic way to prove a battery claim.

Built to survive daily life

Beyond battery life, the V80 Lite 5G has passed military-grade durability tests, with **IP68 and IP69 water resistance, 3-metre drop resistance and IP6X dust resistance** – specs more commonly associated with flagship devices than a “Lite” model.
