

vivo X300 FE With ZEISS Super Telephoto Camera Launches in Singapore on 6 June 2026 From S\$1,099

Description

vivo has officially announced the **X300 FE**, a compact flat-design flagship built around a ZEISS co-engineered imaging system. The phone launches in Singapore on **6 June 2026** starting at **S\$1,099**, with pre-orders open from 25 May to 5 June 2026.

ZEISS Triple-Camera System With Telephoto Extender

The X300 FE sports a triple-camera configuration: a **50MP ZEISS Super Telephoto Camera**, a **50MP ZEISS Main Camera**, and a **110° Ultra-Wide Low-Distortion Camera**. For the first time in the FE series, vivo is introducing the **vivo ZEISS Telephoto Extender Gen 2** — an accessory that extends shooting to a 200mm equivalent focal length. Built on Kepler-based optics with 15 high-transmittance glass elements, the second-gen extender weighs just 153g (down from 210g previously).

The camera system is powered by the AI True Clarity Engine (combining NICE 3.0 and MAGIC 2.0) for enhanced detail reconstruction. Shooting modes include Stage Mode optimised for concerts and low-light events, Street Photography Mode for authentic documentary shots, and ZEISS Multifocal Portrait with focal lengths from 23mm to 100mm. Video capabilities extend to 8K at 30fps, 4K at 120fps, and Dual-View Stage Video.

Slim, Lightweight Flat Design

Despite its flagship imaging hardware, the X300 FE keeps things compact. It features a **6.31-inch flat display** with ultra-narrow bezels, weighs **191g**, and measures just **7.99mm thin**. The phone is available in two finishes — **Mist Purple** and **Luxe Black** — both featuring a Metallic Sand AG glass back with matte texture and an aerospace-grade aluminium frame.

Snapdragon 8 Gen 5, 6,500mAh Battery, IP68+IP69

Under the hood, the X300 FE runs on the **Snapdragon 8 Gen 5** with an Efficient VC Liquid Cooling System (4,005mm² vapour chamber). The **6,500mAh BlueVolt Battery** supports **90W FlashCharge** and **40W Wireless Charge**, with 4th-Gen Silicon Anode Technology for better energy density. The device is rated **IP68 and IP69** for dust and water resistance, and comes with 5 years of OS upgrades and 7 years of security maintenance.

Software is handled by **OriginOS 6**, which features the vivo Office Kit for cross-device productivity across Windows, Mac, and iPad, plus One-Tap Transfer for iPhone, and a Private Space for secure file storage.

Singapore Pricing & Pre-Order Offers

The vivo X300 FE (12GB + 256GB) is priced at **S\$1,099**. The **Telephoto Extender Kit** is available separately from **S\$299**. Buying both together saves S\$100, bringing the bundle to **S\$1,298** (offer valid until 14 June 2026, while stocks last).

All purchasers of the X300 FE will receive a pair of **vivo Buds Air3 (worth S\$99)** as a free gift, along with 2 years of local warranty and 3 months screen care.

Pre-orders run from **25 May to 5 June 2026** on Shopee, Lazada, TikTok, and at authorised retailers including Challenger, Best Denki, Courts, Harvey Norman, Gain City, and Popular. From 6 June, the phone will be available in-store at these retailers and telco partners. vivo's Experience and Service Store is at 313@somerset, #B2-44/45.
