

We were invited to the launch of the HONOR X9c. Probably the toughest phone on the market?

## Description

HONOR is taking this up a few notches. Where your typical phone manufacturers are thinking about long battery life, displays, and the latest gazillion nanometer chip, HONOR is taking this one step further with their latest phone, the HONOR X9c.

We have been working with HONOR in reviewing their phones. They have been sending us their phones to test. If you've noticed, some photos within our posts are shot with HONOR phones. These photos would be watermarked.

We were invited to the launch of the HONOR X9c yesterday. It was held at the NUSS Guild House at Suntec City.

The RRP for this phone is \$449! That is way more affordable than the latest iPhone 16 which costs a kidney...

Now let us make a compelling case for the HONOR X9c.

When looking for a phone, you must ask yourself three important questions.

Question 1: "What if you needed to hammer a nail into a block of wood and all you had was your smartphone?"

Cue the HONOR X9c.

## Durability Test 1

# Hammer Challenge

Step 1 Place a nail on a piece of wood

Step 2 Use the screen of the **HONOR X9c 5G** to carefully hammer the nail

We tried it and it works. The phone survived and the nail went into the block of wood. Yes, it was a solid nail and a solid block of wood.

Question 2: "What if you left your phone next to a set of keys and your nemesis came along and wanted to use the keys to destroy your phone's screen?"

Durability Test 2

# Scratch Challenge

Step 1 Place the phone flat on the table

Step 2 Take a key and scratch it across the screen

We tried and it survived. Yes, that was a solid key and yes the nemesis is Willie himself trying to scratch his phone. Schizophrenia makes one do weird things.

Question 3: "What if you went to Hai Di Lao and all the plates of food took up all the space on the table such that you had nowhere to put your phone but into the hotpot?"

default watermark

We tried and the phone survived. Yes, that was a real hotpot. The water was boiling. However, for this test, I think it needed to be tomato soup. I usually have that at Hai Di Lao.

Clear winner. 3 out of 3 questions were answered comprehensively.

Here are some of the upgrades this phone brings.

OIS for Stable Night Shot | AI Motion Sensing

HONOR X9b: 108MP Ultra Clear Camera, EIS

## Better Entertainment Experience with Dual Speaker

HONOR X9b: Mono Speaker

We had hands-on time with the HONOR X9c.

I think Willie is thinking of getting an HONOR phone.

The phone is available for pre-order today from these authorised retailers and online platforms.

HONOR did send us a HONOR X9c to test and we will be doing a full review of the phone very shortly.

In a very congested mobile phone market, HONOR is creating rather compelling options for consumers. Interested? It's available now for pre-order.

Oh, and there are free gifts! Who does not want free stuff?

Yours sincerely,

Daryl
