

WOK°15 Turns 10: Check the September Offer Before Booking the Marina Meal

Description

Answer first: WOK°15 Kitchen's tenth-anniversary offer is 10 per cent off the À la carte dining bill through September and October 2026, subject to terms. The useful booking decision is whether the menu, Sentosa Cove location and actual discount conditions suit the group.

This guide is written for a diner considering wok°15 kitchen's september or october anniversary offer at sentosa cove. The task is to confirm eligible menu spend, service timing, access and reservation details without treating venue publicity as a restaurant review. It separates official rules from calculations, planning assumptions and outcomes that still require a live readback.

Before acting, write the case-specific date, person, property, account, venue or product at the top of the working note. A source can be authoritative and still be applied to the wrong facts. The controls below are designed to expose that mismatch early.

What the official sources establish

The headline offer is 10 for 10

ONE°15 Marina states that the restaurant offers 10 per cent off the À la carte dining bill for its tenth anniversary. This is stated in the [primary official source](#).

What to do: Confirm that the intended dishes and booking date are covered. The distinction matters because a broadly correct rule can still produce the wrong decision when applied to the wrong route or date.

The window spans two months

The published promotion runs through September and October 2026. This is stated in the [primary official source](#).

What to do: Do not claim a permanent price change. Keep the source beside the decision it supports so that a later reviewer can see both the rule and the case-specific input.

Terms still matter

The release explicitly says terms and conditions apply. This is stated in the [primary official source](#).

What to do: Ask about exclusions, stacking, member pricing and blackout treatment when booking. If the underlying fact changes, reopen this step instead of allowing an old conclusion to travel forward unnoticed.

The restaurant serves Cantonese food

The venue page positions WOKÂ°15 as a waterfront Cantonese dining restaurant at ONEÂ°15 Marina Sentosa Cove. This is stated in the [supporting official guidance](#).

What to do: Match the menu and sharing format to the group rather than booking for the discount alone. A blank or disputed input is a stop condition. It is not permission to insert a convenient assumption.

Access is part of the meal plan

Sentosa Cove timing and transport can affect the practical value of a marina meal. This is stated in the [supporting official guidance](#).

What to do: Add travel time, parking or taxi arrangements to the reservation note. For the reader, that means the next action should be tied to a named record and a date, not to a remembered headline.

Decision table

Question	Reader action	Authority
The headline offer is 10 for 10	Confirm that the intended dishes and booking date are covered.	primary official source
The window spans two months	Do not claim a permanent price change.	primary official source
Terms still matter	Ask about exclusions, stacking, member pricing and blackout treatment when booking.	primary official source
The restaurant serves Cantonese food	Match the menu and sharing format to the group rather than booking for the discount alone.	supporting official guidance
Access is part of the meal plan	Add travel time, parking or taxi arrangements to the reservation note.	supporting official guidance

Work down the table in sequence. Do not close an item with a search snippet, an undated screenshot or another person's outcome. For material money, eligibility, safety or legal points, save the current authority page or formal readback and note its date.

Two tools that add practical value

A S\$120, S\$200 and S\$350 pre-service-charge discount calculation for the stated 10 per cent offer

Build this as a compact table with columns for the reader's actual input, the dated evidence, the rule it activates, the responsible person and the next irreversible step. The table must preserve alternatives rather than collapse them into one total. Mark estimates and pending confirmations visibly, because an elegant calculation based on the wrong route is still wrong.

A visit-choice table comparing weekday lunch, weekend brunch and dinner, plus the Sentosa-gantry reimbursement note

Use this as a separate challenge to the first analysis. Test the strongest contrary scenario, the missing document and the event most likely to make the answer stale. Keep the check practical: it should change a date, amount, route, booking, household rule or go/no-go decision. If it cannot affect the decision, remove it instead of padding the file.

Worked example

A party of six wants a Saturday dinner and expects a S\$30 saving on a S\$300 Ã la carte bill before service charge and GST. It labels that number as an illustration, confirms the promotion and exclusions directly, then chooses dishes based on the current menu. The meal stands on its own; no affiliated booking link is used.

The example is labelled as an illustration. Replace its circumstances and figures with current evidence, and preserve the branch that was rejected so the reasoning can be reconstructed later.

Action checklist

1. Confirm that the intended dishes and booking date are covered. Retain the evidence supporting this point: ONE°15 Marina states that the restaurant offers 10 per cent off the Ã la carte dining bill for its tenth anniversary.
2. Do not claim a permanent price change. Retain the evidence supporting this point: The published promotion runs through September and October 2026.
3. Ask about exclusions, stacking, member pricing and blackout treatment when booking. Retain the evidence supporting this point: The release explicitly says terms and conditions apply.
4. Match the menu and sharing format to the group rather than booking for the discount alone. Retain the evidence supporting this point: The venue page positions WOK°15 as a waterfront Cantonese dining restaurant at ONE°15 Marina Sentosa Cove.
5. Add travel time, parking or taxi arrangements to the reservation note. Retain the evidence supporting this point: Sentosa Cove timing and transport can affect the practical value of a marina meal.

Assign an owner and due date to every open item. If the earliest irreversible step arrives before the critical evidence, pause. That is especially important before paying, signing, applying, travelling, changing payroll or relying on a health or safety plan.

Limits and final readback

Menu items, prices, availability and promotion terms may change. WOKÂ°15 and ONEÂ°15 Marina control the live booking and bill.

At the point of action, reopen both the [primary official source](#) and the [supporting official guidance](#). Check publication or update dates, confirm that the quoted rule still appears, and use the authorityâ??s live service or named operator where a case-specific result is required.
